Introduction

PayPal, a Global Leader in Online Payments

A reliable, simple, and effective payment solution. A definite plus for your customers.

How Does it Work?

On your site:
your customer places
an order.

**On your payment
page:**
the customer makes
a payment using the
PayPal system to pay
for his/her order.

**When the transaction
is complete:**
your PayPal account is
immediately credited.

**You can transfer your
money free of charge***
to your bank account
or make purchases
online using your
PayPal account.

* If no currency conversion is required

Advantages of PayPal

- Your customers do not need to pay any fees for using PayPal.
- They do not have to enter their bank details for every payment and can pay for their purchases by card, bank account, or directly with their PayPal balance, up to 26 currencies.
- It is so easy and secure that 148 million users** worldwide have already chosen to make payments with PayPal. By accepting a wide range of payment methods, your business gains strength and your customers pay with full confidence.

**Source: Internal 2014 eBay data

Did You Know ...

With PayPal:

- You opt for a clear fee schedule, with no hidden costs: you pay a commission for each transaction whenever you receive a payment. The more you sell, the lower the commission.
- You are already selling on mobile devices: your payment page automatically adapts (thanks to automatic detection on the PayPal payment page).

Your customers can benefit from Buyer Protection and know that they will get delivery or be reimbursed***.

*** Except Russia and all CEE countries. Subject to conditions:
<https://www.paypal.com/fr/webapps/mpp/buyer-protection>

**Activate PayPal as a payment method in your PrestaShop back-office.
It's easy and free.**

Which PayPal Payment Solution Should You Choose?

Personalized Payment Solutions

	PayPal Standard <i>A payment system fully integrated into your site.</i>	PayPal Hosted Sole Solution* <i>An advanced version of PayPal Standard.</i>	PayPal Express Checkout <i>An additional payment method using a PayPal account.</i>
When should I choose this solution?	I would like to accept payments by card, charge card, bank account, and PayPal account.		I would like to add payment by PayPal account in addition to my current payment solutions.
Description	<ul style="list-style-type: none"> • Be billed only when you receive payments. • Accept payments by email, even without having a site • Receive payments on eBay 	<p>In addition to the benefits of PayPal Standard:</p> <ul style="list-style-type: none"> • Benefit from a reduced issuing commission on a sliding scale • Offer your customers an easy purchase by adapting your payment page to your corporate design and by customizing the images, colors, and formats. • Benefit from cover in case of dispute, with our Seller Protection program** 	<p>Ideal if you already accept other payment methods on your site.</p> <ul style="list-style-type: none"> • Also offer your customers a way to pay with their PayPal account in just a few clicks. It's so easy and secure that 143 million users*** worldwide have already chosen PayPal to make a payment.
Types of payment accepted	Visa, Mastercard, PayPal and all local major electronic payment methods		PayPal
Installation	Skill level required: Easy	Skill level required: Intermediate	Skill level required: Intermediate

Did You Know ...

34% of PayPal buyers in Europe**** abandon their online purchase if PayPal is not offered as a means of payment.

Their reasons are clear:

79% of customers surveyed in Europe**** stated they have abandoned their purchase for security reasons if PayPal is not available.

22% of customers in Europe**** have said that they prefer the **simplicity of paying with PayPal**. The customers that use PayPal regularly to make their purchases recognize that it is **more secure**. They are looking for that security, whether on their **computer**, on a **tablet** or on a **mobile device**.

* Available in France, Italy, Spain

** Subject to conditions: <https://www.paypal.com/fr/webapps/mpp/paypal-safety-and-security>

*** Source: Internal 2013 data

**** Research conducted by NorthStar in Q4 2013. Based on a sample of 103 large online retailers selected for inclusion and representing 26,653 recent buyers. Sample is not necessarily representative of the large online retailer marketplace as a whole. Survey conducted in United Kingdom, Turkey, France, Norway, Denmark, Israel, Qatar, United Arab Emirates, Portugal, Netherlands, Spain, Sweden, Germany, Italy, Poland.

Add the PayPal Module to Your PrestaShop Store

To allow you to accept PayPal payment solutions on your site

How Do I Add the PayPal Module for PrestaShop?

The PayPal module is free and pre-installed in the PrestaShop store.

- Click **Payment⁽¹⁾** on the Modules tab
- Look for the **PayPal Europe** module in the drop-down menu or by using the search bar⁽²⁾
- Click the **Install button⁽³⁾**.

This screenshot shows the PrestaShop back office's 'Modules' list page. A blue circle labeled '1' highlights the 'MODULES' tab in the left sidebar. A blue circle labeled '2' highlights the search bar where 'PayPal' has been typed. A blue circle labeled '3' highlights the green 'Install' button for the 'PayPal v3.7.0 - by PrestaShop' module, which is listed under the 'Payments and Gateways' category.

A message⁽¹⁾ will then tell you if the PayPal module was installed successfully.

This screenshot shows the 'Configure "PayPal" module' page. A blue circle labeled '1' highlights a green success message: 'Module(s) installed successfully.' The main content area features the PayPal logo and the heading 'LEADER IN ONLINE PAYMENTS'. It includes a brief description: 'Easy, secure, fast payments for your buyers.' To the right, there's a list of benefits with checkmarks: 'Get more buyers', 'Access international buyers', 'Reassure your buyers', and 'Accept all major payment methods'. At the bottom, there's a section titled 'SELECT YOUR SOLUTION' with a 'Learn more' link, and a note: 'Need PayPal to process all your card payments?'. Below that is a note about website payments standards with options to choose between them.

Congratulations, you have installed the PayPal module for PrestaShop.
You must now activate one of our various payment solutions.

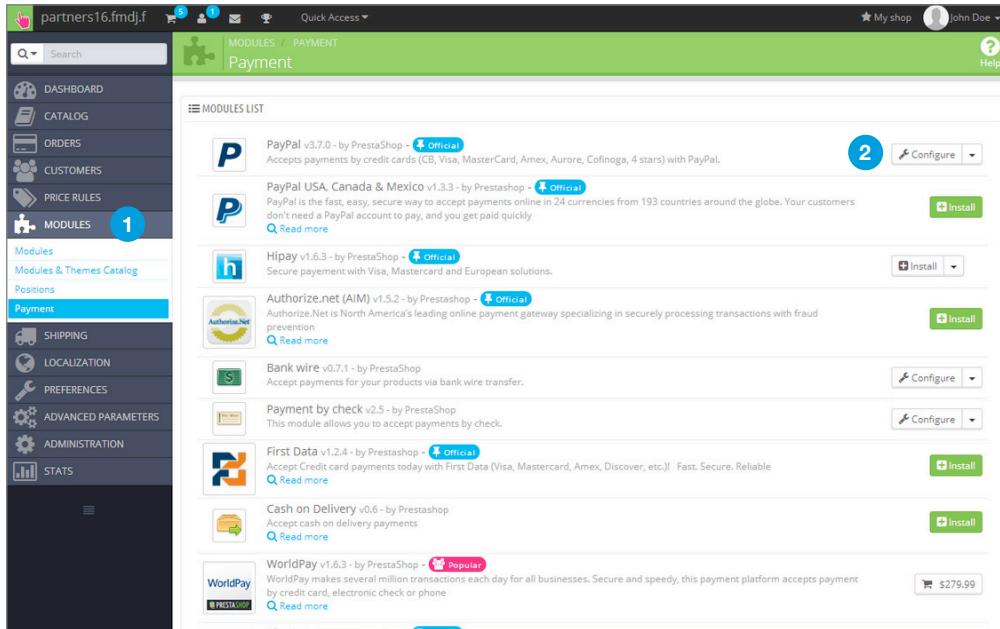

Configure Your PayPal Module

Configuration of your PayPal module allows you to accept the various payment methods.

How do I Access the PayPal Module?

To access the PayPal module:

- On the Module tab⁽¹⁾ click **Payment**
- Click the **Configure⁽²⁾** button for the PayPal module, then Validate

The screenshot shows the PrestaShop back office interface. The left sidebar has a 'Modules' tab highlighted with a blue circle labeled '1'. The main content area is titled 'MODULES / PAYMENT' and shows a list of payment modules. The 'PayPal' module is listed first, with a 'Configure' button highlighted with a blue circle labeled '2'. Other modules listed include 'PayPal USA, Canada & Mexico', 'Hipay', 'Authorize.net (AIM)', 'Bank wire', 'Payment by check', 'First Data', 'Cash on Delivery', and 'WorldPay'.

Now that you have accessed the PayPal module, you are able to configure it as you choose, by selecting one of the different payment solutions available.
(see page 6):

- **PayPal Standard**
- **PayPal Hosted Sole Solution**
- **PayPal Express Checkout**

NOW THERE ARE TWO DIFFERENT SCENARIOS:

You do not have a PayPal Business account:

Please refer to the following pages to create a PayPal account (essential for receiving your transactions) directly from your PrestaShop interface, then configure your PayPal module at your convenience.

[Go to page 11](#)

You already have a PayPal Business account:

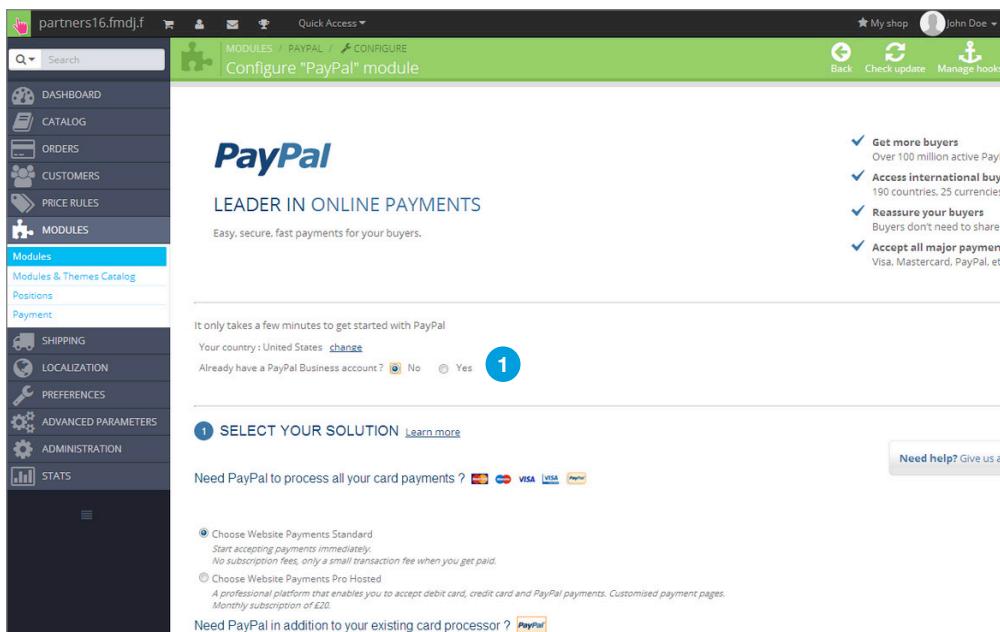

In this case, you will only need to select **Yes** next to the question **Do you already have a PayPal Business account?** then follow the instructions to retrieve the information required from your PayPal account to configure your module.

[Go to page 15](#)

Create a PayPal Business Account from PrestaShop

If you do not have a PayPal Business account, you will need to open one when you install your PayPal module on PrestaShop.

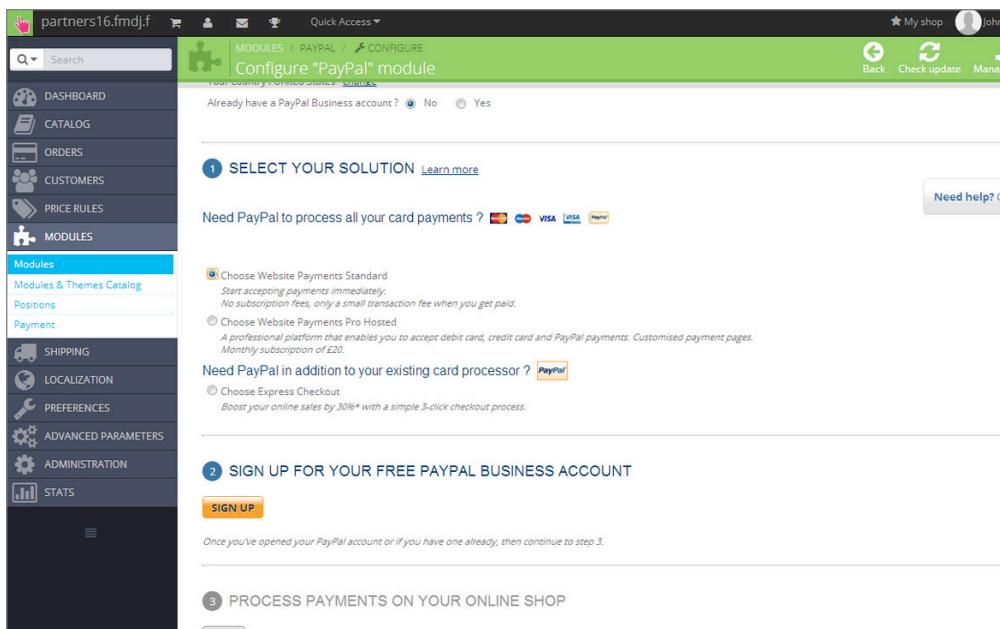

To do so, select **No⁽¹⁾** next to the question “Do you already have a PayPal Business account?”

The screenshot shows the PrestaShop back office interface. On the left, there's a sidebar with various modules like Dashboard, Catalog, Orders, Customers, Price Rules, and Modules. Under Modules, 'Payment' is selected. In the main content area, it says 'Configure "PayPal" module'. There's a large 'PayPal' logo and the text 'LEADER IN ONLINE PAYMENTS'. It says 'Easy, secure, fast payments for your buyers.' To the right, there's a list of benefits: 'Get more buyers', 'Access international buyers', 'Reassure your buyers', and 'Accept all major payment'. Below that, it says 'It only takes a few minutes to get started with PayPal'. It asks 'Your country: United States' with a 'change' link. A radio button for 'No' is selected, and a radio button for 'Yes' is shown with a blue circle containing the number 1. A 'Need help?' button is also present.

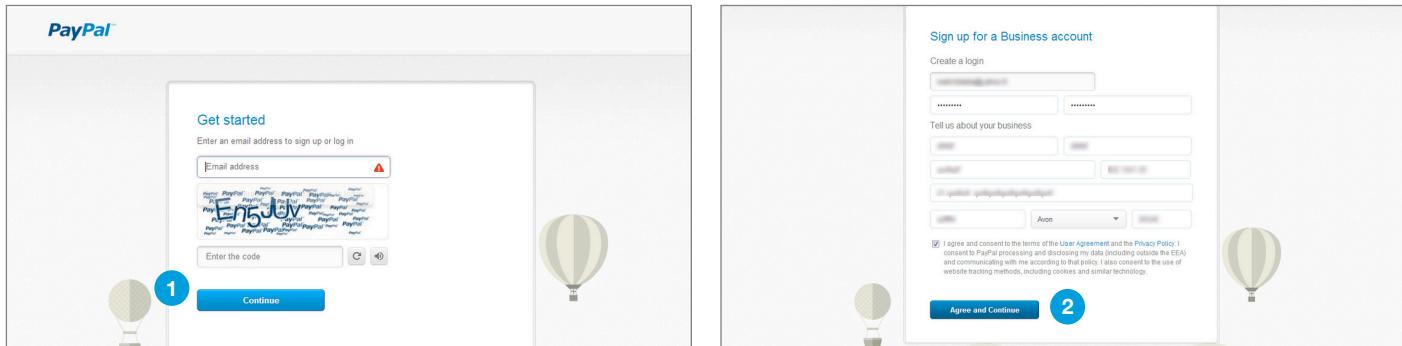

Select the PayPal payment solution of your choice (see page 6), then continue with Step 2: **Sign up for a PayPal Business account**

Opening the account is free!

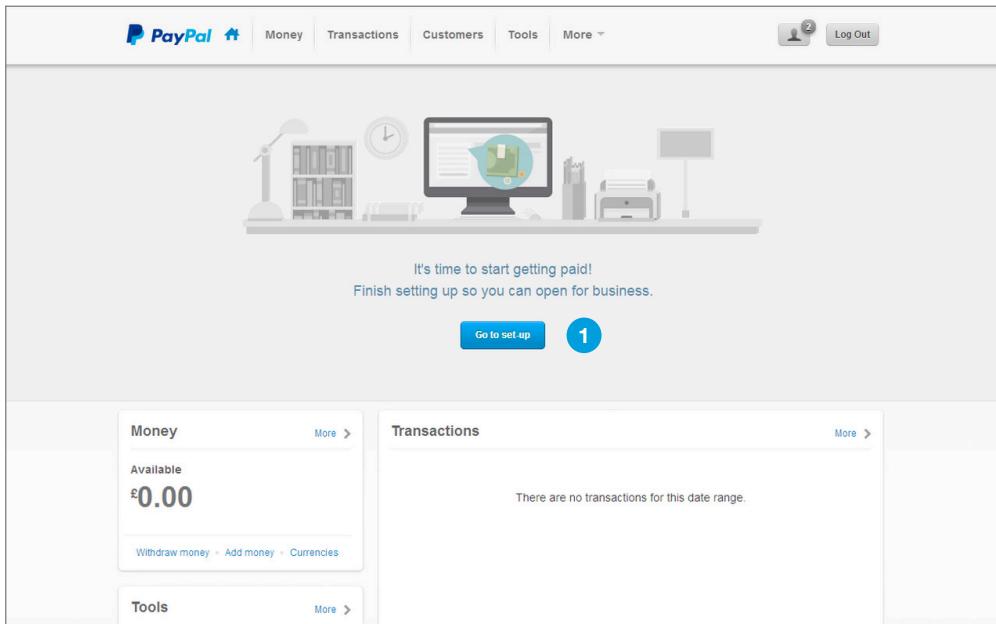

This screenshot is similar to the previous one but shows the process further along. The 'No' radio button is still selected. Below it, under 'SELECT YOUR SOLUTION', there are two options: 'Choose Website Payments Standard' (selected) and 'Choose Website Payments Pro Hosted'. Both descriptions mention accepting payments immediately or via a professional platform with a monthly subscription. A 'Need help?' button is also present.

Fill out the form, then click on **Continue⁽¹⁾**
Agree and Continue⁽²⁾ once you have entered the information requested about your business.

Once the PayPal Business account has been created:

Click **Go to set-up⁽¹⁾**

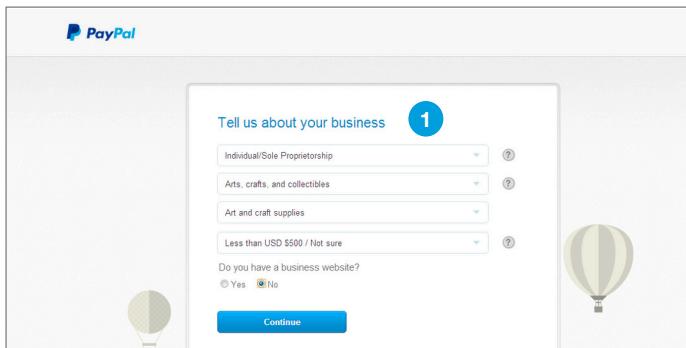

Now confirm your email address by clicking the link you will receive in your inbox.

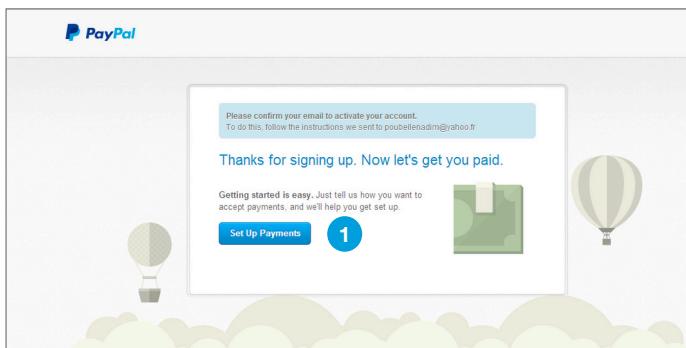

Congratulations, your PayPal Business account on PrestaShop is now activated!

Once the e-mail address has been confirmed:

Log in using the password you set when you registered, then follow the instructions to complete **the information about your company⁽¹⁾**.

You can now start the configuration of your account for receiving payment on PayPal:
Click **Send** then **Set Up Payments⁽¹⁾**

Congratulations, you can now receive payments!

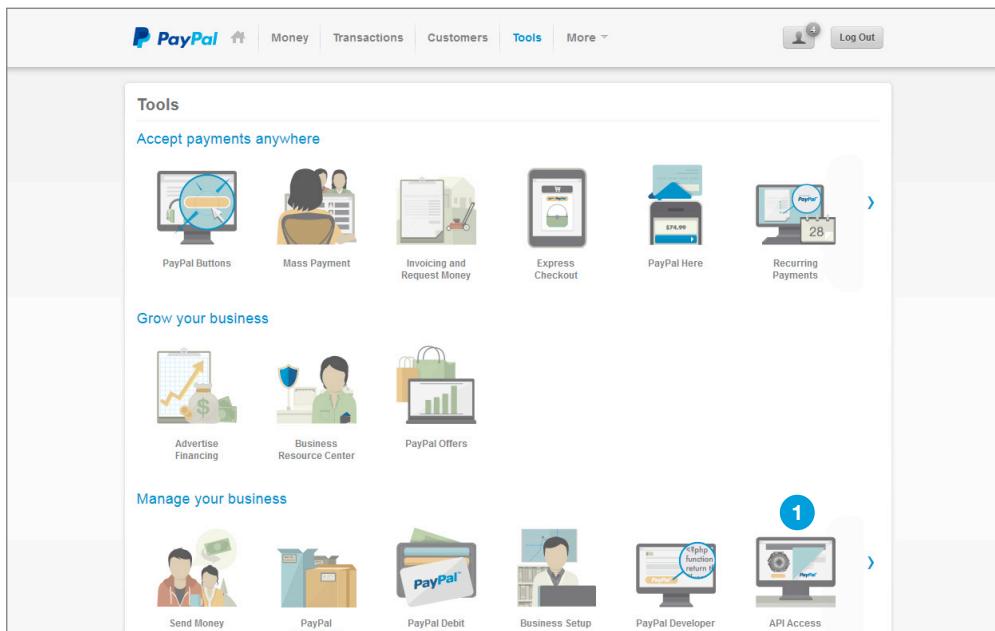

Installation of PayPal Payment Solutions

PayPal Standard / PayPal Hosted Sole Solution / PayPal Express Checkout

How Do I Add PayPal Standard?

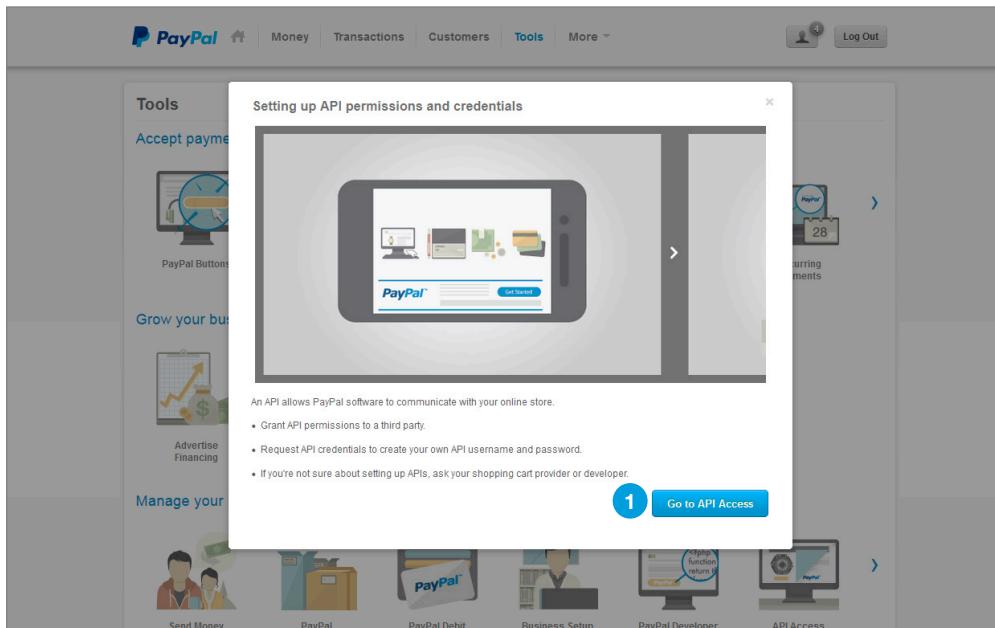

Log in to your PayPal account, go to the **Tools** tab, then click [API Access^{\(1\)}](#).

Request an API Signature on your PayPal Account:

To request an API signature, which you will need to establish the link to your PrestaShop platform:

- Click [Go to API Access^{\(1\)}](#)

Click Request API Credentials⁽¹⁾

The screenshot shows the 'API Access' section of the PayPal developer portal. It provides two options for setting up API permissions:

- Option 1 - Grant API permissions to a third party**:适用于使用第三方购物车或由第三方托管的网站。链接：[Grant API permission](#)
- Option 2 - Request API credentials to create your own API username and password**:适用于自定义网站和在线商店，或在自己的服务器上运行的集成购物车。链接：[Request API credentials](#)

下方有接受付款条款、常见问题以及关于API概念的链接。

- Select **Request API signature⁽¹⁾**.
- Then click **Agree and Submit⁽²⁾**.

The screenshot shows the 'Request API Credentials' page. It explains that API credentials consist of three elements: an API username, an API password, and either an API signature or an API SSL client-side certificate. It asks whether you're using a shopping cart or solution provider.

Two radio buttons are shown:
1. Request API signature if your shopping cart or solution provider has asked for an API username, password, and signature, or if you're developing a custom shopping cart.
2. Request API certificate if your shopping cart or solution provider requires a file-based certificate.

Below the buttons, there's a note about needing help and links to learn more and agree to terms. A 'Agree and Submit' button is highlighted with a blue circle.

Tip: once the procedure is complete, you can **Display your API signature⁽¹⁾** at any time.

Enter the API data in the PrestaShop back-office:

Once the API signature has been obtained on PayPal, you can [enter this data](#) directly into the PrestaShop platform.

It is important that these data be entered correctly or you will not be able to receive PayPal payment.

- Select [PayPal Pro Hosted or Sole Solution^{\(1\)}](#) in step 1: SELECT YOUR SOLUTION
- Configure your solution (step 3) by [filling in the fields requested^{\(2\)}](#).

Configure "PayPal" module

It only takes a few minutes to get started with PayPal

Your country: Spain [change](#)

Already have a PayPal Business account? No Yes

1 SELECT YOUR SOLUTION

Need PayPal to process all your card payments?

Choose Website Payments Standard
Start accepting payments immediately.
No subscription fees, only a small transaction fee when you get paid.

Choose Website Payments Pro Hosted
A professional platform that enables you to accept debit card, credit card and PayPal payments. Customised payment pages.
Monthly subscription of £20.

Need PayPal in addition to your existing card processor?

Choose Express Checkout
Boost your online sales by 30%* with a simple 3-click checkout process.

Please click on the **SAVE** button at the bottom of the page only once PayPal has approved your application for this product, otherwise you won't be able to process any card payments. This process can take up to 3-5 days.

2 SIGN UP FOR YOUR FREE PAYPAL BUSINESS ACCOUNT

APPLY **2**

*Important: Please click on the **SAVE** button at the bottom of the page only once PayPal has approved your application for this product, otherwise you won't be able to process any card payments. This process can take up to 3-5 days.*

3 PROCESS PAYMENTS ON YOUR ONLINE SHOP

To finalize setting up your PayPal account, you need to :

1. Confirm your email address : check the email sent by PayPal when you created your account
2. Link your PayPal account to a bank account or a credit card : log into your PayPal account and go to "My business setup"

How Do I Install PayPal Hosted Sole Solution?

- Select **PayPal Pro Hosted or Sole Solution⁽¹⁾** in Step 1: SELECT YOUR SOLUTION
- Then click **Apply** in Step 2.

The screenshot shows the PrestaShop back office interface. On the left, there's a sidebar with various modules like Dashboard, Catalog, Orders, Customers, Price Rules, and Modules. Under Modules, 'Payments' is selected. The main content area is titled 'Configure "PayPal" module'. Step 1: SELECT YOUR SOLUTION is highlighted with a blue circle. It asks if PayPal should process all card payments and lists two options: 'Choose Website Payments Standard' (radio button) and 'Choose Website Payments Pro Hosted' (radio button, selected). A note says 'A professional platform that enables you to accept debit card, credit card and PayPal payments. Customised payment pages. Monthly subscription of £20.' Step 2: SIGN UP FOR YOUR FREE PAYPAL BUSINESS ACCOUNT is also visible. At the bottom right, there's a 'Need help? Give us a call' button.

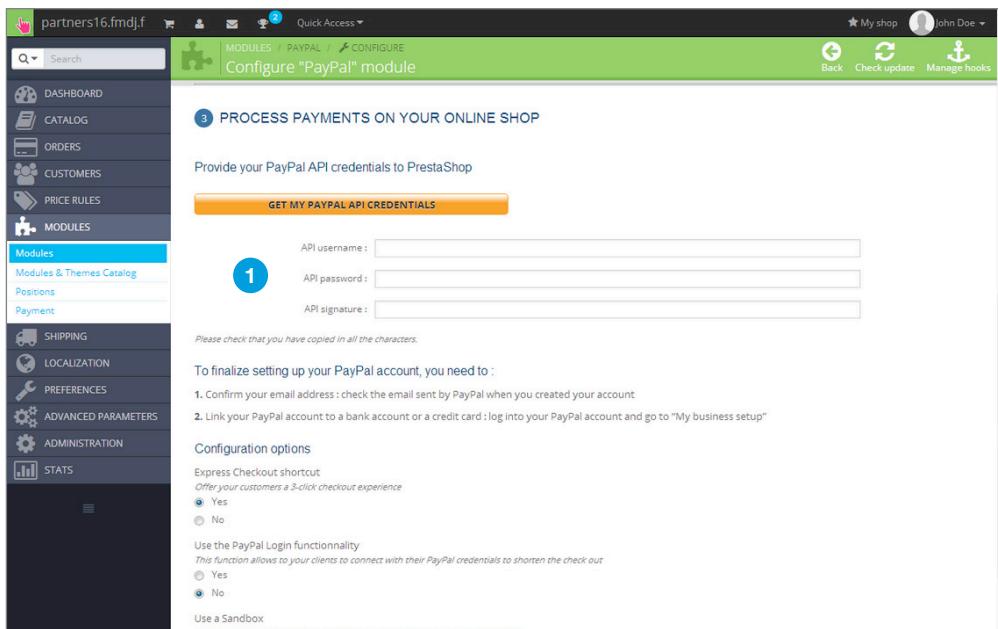

- Next, enter the details of your PayPal account (email + password)
- Click **Sign in⁽¹⁾**
- When you are redirected to the PayPal / PrestaShop page, click **Subscribe**.

The screenshot shows the PayPal sign-in page. It has two main sections: 'Apply for PayPal Payments Pro' (with a 'Sign Up' button) and 'Use my existing PayPal account' (with fields for 'Email address' and 'Password', and links for 'Forgot your email or password?' and 'Sign In'). A large blue circle highlights the '1' at the bottom center of the page, indicating the step to click 'Sign In'.

Subscription to the Service via PrestaShop

After PayPal has validated your registration, you can go back into the back-office of PrestaShop,

- Re-enter the email address for your⁽¹⁾ PayPal account
- Click **Save**.

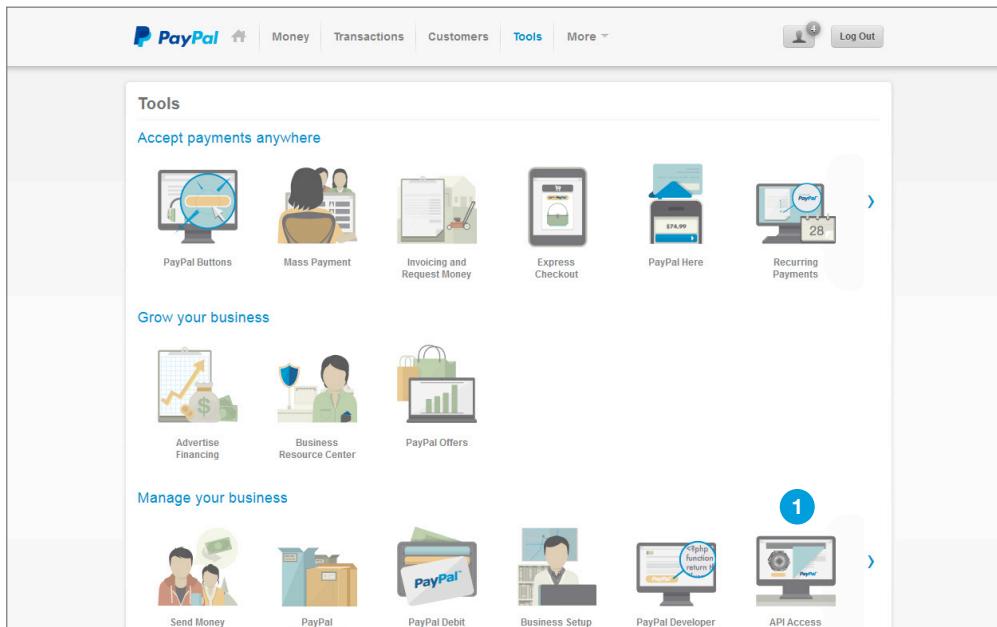

Congratulations, you have correctly configured PayPal Hosted Sole Solution!

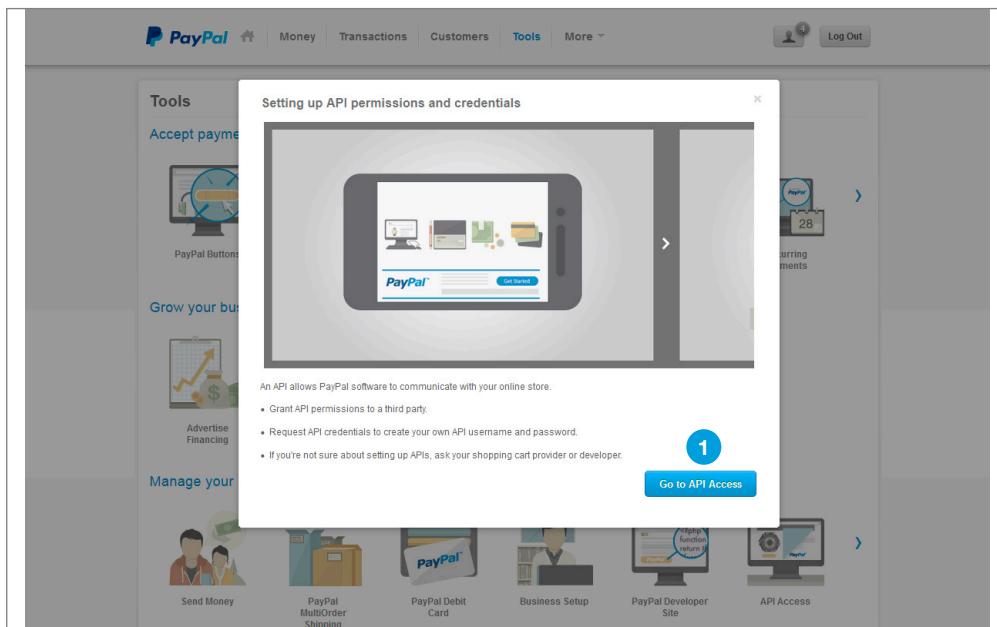

How Do I Install PayPal Express Checkout?

Just as with the PayPal Standard option, PrestaShop will request your API signature in order to integrate PayPal Express Checkout.

- Log in to your PayPal account, and then go on the **Tools** tab
- Click **API Access⁽¹⁾**

- Then click **Go to API Access⁽¹⁾**.

Click **Request API credentials⁽¹⁾**.

The screenshot shows the 'API Access' section of the PayPal developer portal. It compares two options: 'Grant API permission' (Option 1) and 'Request API credentials' (Option 2). Option 2 is highlighted with a blue circle containing the number '1'. A call-to-action button labeled 'Request API credentials' is also circled with a blue '1'. Below the main content, there's a note about accepting payments and links to express checkout and developer documentation.

Select **Request API signature⁽¹⁾** then click **Agree and Submit⁽²⁾**.

The screenshot shows the 'Request API Credentials' page. It details the three elements of API credentials: API username, API password, and either an API signature or an API SSL client-side certificate. It asks if you're using a shopping cart or solution provider. A radio button for 'Request API signature' is selected and circled with a blue '1'. A note at the bottom provides help on deciding between signatures and certificates. A 'Agree and Submit' button is circled with a blue '2'.

Enter the API Data in the PrestaShop Back-Office

Once the API signature has been obtained on PayPal, you can [enter this data^{\(1\)}](#) directly into the PrestaShop platform.

It is important that these data be entered correctly or you will not be able to receive PayPal payment.

The screenshot shows the PrestaShop back-office interface with the URL 'partners16.fmdj.fr'. The left sidebar is visible with various modules like Dashboard, Catalog, Orders, Customers, Price Rules, and Modules selected. The main content area is titled 'Configure "PayPal" module' under 'MODULES / PAYPAL / CONFIGURE'. It displays the 'PROCESS PAYMENTS ON YOUR ONLINE SHOP' section. A large orange button labeled 'GET MY PAYPAL API CREDENTIALS' is present. Below it, three input fields are labeled 'API username', 'API password', and 'API signature', each with a corresponding text input field. A note below says 'Please check that you have copied in all the characters.' To the left of the fields is a blue circle containing the number '1'. Further down, instructions say 'To finalize setting up your PayPal account, you need to :'. Two numbered steps are listed: '1. Confirm your email address : check the email sent by PayPal when you created your account' and '2. Link your PayPal account to a bank account or a credit card : log into your PayPal account and go to "My business setup"'. There are also sections for 'Configuration options' (Express Checkout shortcut, PayPal Login functionality), both with 'Yes' and 'No' radio button options, and a 'Use a Sandbox' checkbox.

Congratulations, you have correctly configured PayPal Express Checkout!

To Go Further... Activation of Log In with PayPal

What is Log In with PayPal?

“Login with PayPal” is the eCommerce identification solution that allows your customers to register on your site quickly and safely using their PayPal login information.

With this function, the customer does not have to re-enter the data already recorded in PayPal. You can therefore specifically shorten the buying process, since your customer no longer has to go through the Account Creation step, while still allowing you to retrieve his/her data.

Recommandation:

Add the Log In with PayPal button to the login and home pages of your site.

For your customers, this function breaks down into 3 steps:

1. Choose to log in with PayPal
2. Enter PayPal login information
3. Share the information with you

How Do You Install this Function on your Merchant Site?

You need only to follow these 2 steps :

1. Retrieve the data from your PayPal account, called the App-ID, on the site <https://developer.paypal.com>

To do so, please follow the steps below.

2. Enter these data into your PrestaShop back-office.

For more information about this function, please go to:

<https://developer.paypal.com/webapps/developer/docs/integration/direct/identity/button/>

Retrieval of the “APP-ID” Linked to Your PayPal Account

You must have a live PayPal Business account (“active”) to perform this step (and not a PayPal Sandbox account).

- Go to: <https://developer.paypal.com>
- Log in using your usual PayPal login details (live account details) and click [Log In^{\(1\)}](#).

The screenshot shows the PayPal Developer website. At the top, there's a navigation bar with links for Documentation, Applications, Dashboard, and Support. A blue button labeled 'Log In' is visible. Below the navigation, there's a banner with the text 'Make purchases frictionless with our Mobile SDK' and a subtext 'See how companies like Uber are developing the future of mobile payments.' A 'Learn More' button is present. To the right of the banner is a smartphone displaying the Uber app interface. Below the banner, a section titled 'REST APIs' is shown, stating 'REST APIs are now available in 190 markets and over 25 currencies.' It features three cards: 'Mobile SDKs' (with a smartphone icon), 'REST APIs' (with a gear icon), and 'Classic APIs' (with a flask icon). Each card has a brief description and a 'See our [API Type] APIs' link.

REST APIs are now available in 190 markets and over 25 currencies. [Read the article.](#)

New

New

New

Mobile SDKs
Easy, 100% native iOS and Android SDKs that use our new REST APIs.
[Download mobile SDKs](#)

REST APIs
Great for simple payments using PayPal or credit cards. More REST APIs on the way.
[See our REST APIs](#)

Classic APIs
Perfect for complex payments like subscriptions and checkout. Continued updates and support.
[See our Classic APIs](#)

After you are logged in,

- Click the **Applications tab⁽¹⁾**
- Click **Create App⁽²⁾**

The screenshot shows the PayPal Developer Applications page. At the top, there is a navigation bar with links for Documentation, Applications (which is highlighted with a green box and a circled '1'), Dashboard, and Support. On the right, it shows the user's name 'Frédéric Algarin' and a 'Log out' link. The main content area is titled 'My REST apps' and contains two sections: 'REST API apps' and 'Classic API apps'. The 'REST API apps' section has a sub-section for 'Create an app to receive REST API credentials for testing and live transactions.' It includes a note about account eligibility and a 'Create App' button. The 'Classic API apps' section notes that Adaptive API apps have been moved to Classic APIs and provides a link to 'Create and manage Classic API apps.' At the bottom of the page, there is a copyright notice and links to Privacy policy, Legal agreements, and Contact us.

- Enter an **Application name⁽¹⁾** (for example : ‘Merchant name – Login’)
- Click **Create App⁽²⁾** then click **Create app⁽²⁾** again.

The screenshot shows the 'Create new app' form within the PayPal Developer Applications page. The left sidebar has the 'Applications' section expanded, with 'My apps' selected. The main form is titled 'My REST apps > New app' and has a 'Create new app' heading. It says 'Create an app to receive REST API credentials for testing and live transactions.' A note about account eligibility is present. The 'APPLICATION DETAILS' section is titled 'Basic information that PayPal needs to create your app' and contains a 'App name' field where 'Marchand test - Login' is entered. A note at the bottom states that all apps should be related to business and requires acceptance of the 'PayPal Developer Agreement'. A 'Create app' button is located at the bottom of this section. At the very bottom of the page, there is a copyright notice and links to Privacy policy, Legal agreements, and Contact us.

You need your “Live Credentials” data (and not test credentials)

- Click **show** to display them.

These are the **Client ID⁽¹⁾ data** and **Secret⁽²⁾ data** that you should copy and then paste into the PrestaShop back-office.

You will also need then to fill in the App return URL (live) field.

Click on the **Edit⁽³⁾ hypertext link** next to App redirect URLs to show the hidden form.

Copy and customize the following URL address in **App return URL (live)⁽⁴⁾** :

{url_of_your_website}/modules/paypal/paypal_login/paypal_login_token.php

ex : http://mywebsite.com/modules/paypal/paypal_login/paypal_login_token.php

The screenshot shows the "REST API CREDENTIALS" section of the PayPal developer app configuration. It includes "Test credentials" and "Live credentials".

Test credentials:

- Endpoint: api.sandbox.paypal.com
- Client ID: AWKrhDRtufsSRcDpgvWxirArGeOa-uXPrYbZNIQ9IP_VLeBOH26522r-8
- Secret: EOxyuBDgbJUJW1TPZZ_vq8OYMXnUp_yOui_f4wjcxLpkmBtxFYQYQyaUXI

Live credentials:

- Endpoint: api.paypal.com
- Client ID: AbBzHRA-RsWYqkoldoQdtlnqfBofy2iQSEKhmkWwx70k_pPQnoH_TChzLSSEb
- Secret: EBxXTBDx9eteyS7Jo4MTy4fKTMMShS4-6SqE799XOUZBBOUF2iGhFwd05kc

App redirect URLs:

- App return URL (test): (empty input field)
- App return URL (live): (highlighted input field with number 4)

Buttons at the bottom: Save (disabled), Cancel.

In order to test the function in a test environment, you can use the “Client ID” and “Secret” data of the paragraph “test Credentials”.

At this stage, you have the data that should be copied into the PrestaShop back-office.

So that the function will be operational, you still have to proceed to the following verifications:

- In the section **App Capabilities⁽¹⁾**, check that the **Accept Payments** et **Log In with PayPal** boxes are checked⁽¹⁾.

The screenshot shows the "APP CAPABILITIES" section of the PayPal developer portal. It includes fields for "Endpoint" (api.paypal.com), "Client ID" (A/WznhCNZSosI9juE5hGIDi2vdM1gPpiQLe0YhECJR5fT6jRYYsHJKFFqnon), and "Secret" (EI-tpBBjWtHKGPZ_uSXOCAJuterdCQ_HX4DpSIUTjdKX03O6Gi_rx2HnH). A note below says "Keep your secret credentials private to protect you and your customers." A blue circle with the number 1 is positioned to the left of the "APP CAPABILITIES" heading.

Endpoint	: api.paypal.com
Client ID	: A/WznhCNZSosI9juE5hGIDi2vdM1gPpiQLe0YhECJR5fT6jRYYsHJKFFqnon
Secret	: EI-tpBBjWtHKGPZ_uSXOCAJuterdCQ_HX4DpSIUTjdKX03O6Gi_rx2HnH

Keep your secret credentials private to protect you and your customers.

APP CAPABILITIES Choose how you want your app to integrate PayPal features

Accept payments Accept Payments from PayPal members using PayPal and direct credit card processing. [Advanced options](#)

Log In with PayPal Identity service that enables your customers to log in with their PayPal login [Advanced options](#)

- Then, in the “Log In with PayPal” section of “App Capabilities”, click “Advanced Options.”
- Check the 3 boxes **Personal Information⁽¹⁾**, **Address Information⁽²⁾** et **Account Information⁽³⁾** so that PayPal sends you the information about your customer.
- Leave all of the subcategories checked as well; you will then choose in the PrestaShop back-office the customer data that you want to obtain.
- Enter the URL of the privacy policy and user agreement in the fields **Privacy policy URL⁽⁴⁾** and **User agreement URL⁽⁵⁾**.

This information is mandatory since it will appear on the log in page at PayPal Login (to display this page, click “Preview the customer consent page”).

- If you use **Option +**, it is possible for your customer to pay with PayPal without having to log back in to his/her PayPal account at the time of payment. To enable this, check **Use Seamless Checkout⁽⁶⁾**.

Use Seamless Checkout
Alter your customers login with PayPal, they don't need to log in again at checkout (within an hour)

The field “Allow the customers who haven’t yet confirmed their email address with PayPal, to log in to your app” allows the users who have not yet confirmed their PayPal account to use the function.

You have the choice to activate this function or not.

- Configuration is complete! Click **Save**.

These **App-ID data⁽¹⁾** must now be pasted into the PrestaShop back-office.

The screenshot shows the 'Configure "PayPal" module' page in the PrestaShop back-office. The left sidebar is visible with various modules like Dashboard, Catalog, Orders, Customers, Price Rules, and Modules selected. The main content area is titled 'Configure "PayPal" module'. It includes instructions to check copied characters and finalize setup by confirming email and linking to a bank account. Under 'Configuration options', there's a section for 'Express Checkout shortcut' with a radio button for 'Yes' (selected). Below it is a section for 'Use the PayPal Login functionality' with a radio button for 'Yes' (selected). A note says this allows clients to connect with their PayPal credentials. There's a form to enter 'PayPal account information' with fields for 'Client ID' and 'Secret', both of which are highlighted with a large blue circle containing the number 1. Below these fields are two 'Log In with PayPal' buttons. At the bottom, there's a section for 'Use a Sandbox' with a note about activating a test environment and a radio button for 'Live mode (recommended)' (selected).

The **Client ID** and **Secret** data from the **Live credentials** you retrieved previously must now be entered in the PrestaShop back-office to finish setting up this function.

All done! Your customers will now be able to make purchases on your site more rapidly.

FAQ

How can I personalize my payment page?

You can do this from your PayPal account. In Preferences > My sales > Personalization of the payment page. You will find a list of the style sheets. The default style sheet is called "PayPal." You will have to add a new one that you may call whatever you wish. Specify the URL for your logo and the colors you would like for the frame. Be careful: the images used must be hosted in https, since the PayPal payment page is secure and requires that all the elements displayed also be secure. When you have created this new style page, do not forget to make it "default."

How does the shortcut button work?

The shorcut button redirects the buyer to the PayPal login page. After authentication, the buyer validates the delivery address that is already recorded in his/her account and returns to your site to validate the payment. His/Her delivery information is communicated to your site, where a buyer account can be created if one does not already exist.

What is the difference between the two types of payment: direct and authorization?

The direct mode means that the money moves instantly from the buyer's account to the seller's account at the time of payment. The authorized mode is a deferred mode of payment that requires the funds to be collected manually when you want to transfer the money. This mode is used if you want to ensure that you have the merchandise before depositing the money, for example. Be careful, you have 29 days to collect the funds.

How do I use the module with a test account?

You can create test accounts at <http://developer.paypal.com>. To do a full test on your site, you will need a buyer (personal) account and a seller (business) test account. You will then have to activate the sandbox mode on the module and enter the API identifiers for your test account. To make a payment, use your test buyer's account.

Why is the shortcut button not displayed when I activate it in the module?

Check that the graphic theme that you use allows for display of the PayPal button.
